

Matthews

Loyalty to University was V-P's trademark

Trevor Matthews takes early retirement

BY EVELYN SAMUEL

The man whose talent, tenacity, and taste have defined the physical look of the campus has taken early retirement after 28 years of service to UVic. Trevor Matthews, Vice-President, Administration, took early retirement on Aug. 31, 1993.

Known for his loyalty to the University and his emphasis on the primary educational role of the institution, Matthews leaves behind a campus six times the size of the one to which he came as Assistant to the President (then Malcolm Taylor) on July 1, 1965.

Coming from UBC (where he held a joint appointment with the Business School and the Depart-

ment of Extension), Matthews' duties and titles at UVic quickly grew to include Secretary to the Board of Governors and Director of Institutional Research, while he was, at the same time, a part-time lecturer in economics at UVic. At one time, Matthews held as many as four separate titles simultaneously.

On June 1, 1972, Matthews took over the post of Dean of Administration from Jack Kyle, and his title changed to Vice-President in the late '70s. Over the years, the job has increased in complexity and scope.

"Trevor knew the details of everything that was going on," says President David Strong. "He

was an enormous fount of information for me when I came in 1990. His loyalty to the University was evident in every decision he made, and he made his opinions known in a straightforward and strong manner. You always knew where Trevor stood on an issue."

Matthews was responsible for campus plant and planning, student services (including athletics, the bookstore, residences, counselling, health and food service), the University Centre including the Maltwood Art Gallery, Traffic and Security, and Computing Services. His position has been filled by Don Rowlett, Vice-President, Finance and Operations.

In looking back on a career at the very heart of University decision making, Matthews says, "We can't be all things to all people. We have to do very well those things which we choose to do. I've never been pro-growth for the sake of growth, and I think changes have to be carefully planned. I think we shouldn't get confused about our primary roles as educators and researchers."

Dr. Sam Scully, Vice-President Academic, singles out Matthews' "uncompromising commitment to the long-term academic well-being of UVic" and his attention to the planning and maintenance of the buildings on campus.

"One might disagree with him on matters," says Scully, "but he always thought out his position very thoroughly and he thought ahead for UVic. We are all enormously indebted to him."

Matthews says that he is pleased about many firsts at UVic: he was a founding member of the pension plan for

"We have to do very well those things which we choose to do. I've never been pro-growth for the sake of growth, and I think changes have to be carefully planned. I think we shouldn't get confused about our primary roles as educators and researchers."

faculty and administrative staff, he was on the first board of the Faculty Club, he was a founding member of the UVic Radio Society and of the Victoria Rowing Society. He was also on the negotiating committee with the unions for more than 10 years.

"I'm glad to see that we're sticking with the long-range campus plan," says Matthews. "UVic is unfolding physically in a pleasant way at a reasonable cost. The buildings are standing up well, and our computing support has kept abreast of the times. Our student services are good, and I'm looking forward to more support for students. It's taken nearly 30 years to get Mystic Vale, but, as one of my last acts, I'm very glad we've got it."

What have been some frustrations? Matthews would like the region to acknowledge the fact that transportation is a regional responsibility and not one for the University to solve alone. The new Transportation Task Force (see pages 4 and 5), initiated by Matthews, has just released its report, and he hopes that this will start more co-operation about this issue. He is disappointed that the Centennial Stadium operating

agreement between the University, municipalities, and School Board has collapsed. "It worked well for years, and the stadium was used over 50 per cent of the time by the community," he points out.

Matthews says he looks back on his service to UVic as "all in a day's work."

"During all this time, I've tried to maintain my sense of humour and perspective."

Matthews is well known for his particular brand of humour and is credited with being the originator of several honorary orders and the mystical horse "White Wind." Friends and colleagues are geared up to give Matthews a taste of his own medicine at the reception to honor his career on October 13.

What does the future hold in store? "I have a deep love of the sea and the outdoors, so I'll be spending much more time on the water and at our cottage on Piers Island."

Matthews says, "I've been very focused on my work at UVic. I will always want to be involved in one way or another, but I want to spend more time with my wife, Donna, and my family. And, of course, I've got to keep up to speed with economics."

SOVs discouraged on Travel Smart Day

Members of the University community are asked to try an energy-efficient way of travel to campus on Wednesday, Oct. 6—Travel Smart Day. This is the day selected by the Go Green committee of Greater Victoria as the day to encourage Victorians to try energy-efficient travel alternatives.

UVic students face a challenge from Camosun College to see which campus shows the greater commitment to alternative transport on Travel Smart Day.

Bill Johnston of Traffic and Security, a member of the Go Green committee, suggests walking, cycling, car pooling or B.C. Transit as alternative transportation modes on Travel Smart Day. He hopes that no more SOVs (single occupant vehicles) than necessary will be driven to campus that day.

Spot prizes will be handed out

by Traffic & Security staff to people using alternative transport on Oct. 6, Johnston says. Spot checks of parking lots are done every day, so Traffic & Security will be able to assess the impact of Travel Smart on the campus community.

"Just do it when you can," Johnston advises campus commuters who feel they cannot regularly use energy-efficient transport. "It's a slow process, but it's catching on. We have our first faculty car pool this year," he reports.

The community-based Go Green committee is supporting the drive to make Victoria the leading city in North America in energy efficiency and environmental matters. Members are responsible for implementing their own Transportation Demand management initiatives while supporting and co-ordinating those of other members.

Workshop, garden dedication devoted to native plants

Native Plant Garden south of MacLaurin to be used as open classroom.

BY KEN FARIS

Local native vegetation will be the focus of a day-long workshop set for Oct. 2 at UVic.

Organized by the Native Vegetation Committee of the Vancouver Island Public Interest Research Group (VIPIRG), the Native Vegetation Workshop is open to students and the public and will include two specialized workshops, free seminars, displays and a tour of Mystic Vale.

Following registration in the Elliott Building lecture wing, the day begins with a workshop at 9:30 a.m. entitled "The Use of Native Plants in the Landscape, with Ethnobotanical Notes," presented by Dr. Richard Hebda, Head of Botany and Earth History at the Royal B.C. Museum.

Display tables will be set up by 10 a.m. and the public will be free to meet informally with the various participants throughout the day.

At 11:30 a.m., the Garry Oak Meadow Society will give a free seminar, "Garry Oaks in your Backyard," presented by Dr. Briony Penn. The Society will be distributing Garry Oak seedlings at their display table.

During the lunch break there will be tours of Mystic Vale.

"Attracting Wildlife to your Backyard" is a free public seminar beginning at 1 p.m., presented by Dave Fraser of Thimble Farms. At 1:30 p.m. the day's second workshop, entitled "Introduction to the Propagation of Native Plants," will be led by Brenda Costanzo, assistant curator in the Department of Biology's Herbarium.

The day concludes with the dedication of a new Native Plant Garden, located south of the MacLaurin Building.

Costanzo, one of the members of the VIPIRG Native Vegetation Committee, says that

seed money for the project is a \$2,000 donation by the UVic graduating class of 1993. She acknowledges the efforts of Gavin Davidson, president of the graduating class and a geography and environmental studies student, in obtaining these funds. Also involved in initiating the project were Dr. Nancy Turner (Environmental Studies) and Neville Winchester (Biology).

"Part of VIPIRG's impetus for setting up a Native Plant Garden on campus is to help raise the public's awareness about the need to preserve our natural habitat," says Costanzo. "The Native Plant Garden is a visual stepping stone toward the preservation and rehabilitation of some of the green spaces left on campus."

The Native Plant Garden has been located tentatively in the former phase one site of the UVic Finnerty Gardens, re-

nowned for its collection of rhododendrons and azaleas. The new garden will give the public and students an example of the compatible use of native and cultivated plants within the same garden.

Tony James, Manager of Buildings and Grounds, says many of the remaining plants will be left to grow among newly planted areas.

"Only small parts of the three-quarter-acre site will actually be made available for planting with native plants," says James.

Costanzo says she envisions that there will be a slow transformation between a cultured garden and a native plant garden, as natural vegetation is given time to grow in, with supplemental planting of nursery-propagated native vegetation.

She adds that the Native Plant Garden is also intended to be used as an open classroom for Biology, Environmental Studies and Geography courses. She said class projects might include planting, putting up informational signs, and setting up bird houses within the garden.

Registration for the Native Vegetation Workshop is \$15 per session, \$10 for students and seniors. Registrants will receive a \$5 deduction if they register for both workshops.

Registration opens at 9 a.m. on a first-come, first-serve basis and is by cash only. Enrolment is limited to 30 participants per session. All funds will go toward the purchase of plants for the Native Plant Garden.

For further information, contact Brenda Costanzo (721-7097) or Trevor Walker (721-2706).

Costanzo in Herbarium

Herbarium plants

Wildflower enthusiasts welcome at Herbarium

The collection of preserved wildflowers in the University of Victoria Herbarium in the Cunningham Building comes from around British Columbia, other parts of North America, and Europe. The Herbarium, located in Cunningham 210, is

concentrating on making its collection open to students and the public.

A herbarium is a collection of dried pressed plants preserved on thin mounting cardboard with

attached data labels. "It's like a reference library of plants," says assistant curator Brenda Costanzo. UVic's Herbarium was initiated in the early 1960s by UVic biologist Dr. Marc Bell (retired) and continues to expand through undergraduate and graduate student collections, faculty research, and staff field collecting.

The curator of UVic's Herbarium is Dr. Geraldine Allen (Biology). She and Costanzo both teach, carry out research, and are available to identify plant specimens and to answer questions on related botanical topics.

"Marc [Bell] sent students out in the 60s to build the Herbarium. They did the whole island. We have plants from the four corners of the world in here, but we concentrate on B.C. We tend to collect on our holidays. Wherever we go, we take a plant press," Costanzo says.

The data on the plant labels is very thorough—"Marc Bell stressed ecological data," adds Costanzo. Altogether the files of

the herbarium hold approximately 35,000 dried plant samples. Among the collections are the three species in B.C. now protected by law: *Rhododendron macrophyllum*, *Trillium avatum*, and the native dogwood tree, *cornus nuttallii*.

Members of the general public as well as students, staff, and faculty can arrange access to the herbarium by phoning Allen or Costanzo at 721-7097.

Public Relations director departs

This is the last issue of *The Ring* to be produced under the managing editorship of Evelyn Samuel who, after six years as Director of UVic Public Relations and Information Services, is taking early retirement from the University.

The staff of Public Relations and *The Ring* wish Evelyn every happiness in her new adventures.

The Ring will continue to be published every two weeks during the academic year. *The Ring* editorship will remain with Donna Danylchuk and the position of managing editor will be filled by Ken Faris who is taking on the position of acting director of Public Relations.

The Ring is published every second Friday during Winter Session at the University of Victoria. The Publisher is Public Relations and Information Services, P.O. Box 3060, Victoria, B.C. V8W 3R4.

Science Olympics are coming

Talented young scientists from throughout Vancouver Island will converge on UVic Oct. 15 for a day of workshops, competitions, and weird science from Dr. Zonk as part of this year's Science Olympics. Most of the action will take place in Elliott 140 and 144 although early word has it that one of this year's mystery competitions will send the students outside.

Organizer Dr. George Beer (Physics) expects 96 grade 11 and 12 students to travel to UVic for the day of science and fun. They're selected by their teachers for the opportunity to visit the campus and learn from members of the University's faculty.

Half the group will participate in workshops in the morning while the remainder will engage in science-related competitions. The two groups will reverse activities in the afternoon. All will attend a performance by Dr. Zonk and attend an awards ceremony.

In the past, the timed competitive events have included whipping up a multi-layered, non-alcoholic cocktail, changing the colours of a carnation's petals, and identifying unknown chemical properties. Those who would like to learn more about the Science Olympics or would like to help out that day are asked to contact Beer at 721-7745.

University's unofficial historian publishes 'personal history'

"There are all sorts of things that you still can't talk about."

BY PATTY PITTS

Readers looking for scandalous revelations and vindictive prose will find neither in the soon-to-be-released history of UVic and Victoria College *Multitude of the Wise* by Dr. Peter Smith (Classics). His goal was not to be a harsh critic but to write "a personal history" drawing on decades of contact with alumni and faculty ranging from the members of Victoria College's inaugural class to the five people Smith has dubbed "UVic's unquestionable campus characters."

"There are all sorts of things that you still can't talk about," says Smith about his 95,000-word work that covers the University's history from the early days of Victoria College to the arrival of former President Howard Petch. "It's too soon. Even if the people involved are dead, they have family members who might be hurt by seeing certain things in print."

Smith was not out to hurt anyone's feelings when, at the request of UVic President David Strong, he sat down last fall to transform his decades of work as the University's unofficial historian into a volume that would be completed in time to

celebrate UVic's 90/30 Anniversary year.

"I wanted to get some of that living testimony down on paper," Smith explains. "I wanted to present UVic in light of its past and examine how it resembles what it once was."

The first book-length history of UVic, containing over 200 photos, was written and designed on campus. The UVic Alumni Association is publishing the book which features numerous, but short, references to college and university graduates.

"I don't devote more than a paragraph to anybody," says Smith. "It was frustrating to not be able to write more because many of our alumni are very accomplished and interesting. I found one who was once the honorary mayor of Wreck Beach!"

Smith's fascination with UVic's history began over three decades ago. He'd attended Victoria College in 1950 before completing his degree at UBC and earning a PhD at Yale. After doing some teaching, Smith arrived back at Victoria College as a faculty member in 1960. His status as an alumnus prompted

then Principal Harry Hickman to ask Smith to "keep an eye on Vic College" as it evolved into the University of Victoria.

"I was appointed as the honorary historian of Victoria College," recalls Smith. "In those days that consisted mainly of saving things and squirreling things away. Now it's records management. Then it was saving interesting stuff."

Occasionally, Smith wrote short, historical articles and gave lectures and 10 years ago was encouraged by former President Howard Petch to collect his material in a book.

"During the 80s I did some serious research about the College, but I put that on the back burner after a history of the University in booklet form was published," says Smith, "but that was written with the understanding that no names be mentioned except in the context of telling the chronological history of UVic. Then last fall David asked me to try to do the book as a 90/30 project."

Smith was skeptical he could accomplish his task while maintaining a full teaching load, being Chair of his department and chairing the ceremonies committee. Yet the book is on schedule and Friesen Printing of Manitoba expects to deliver *Multitude of the Wise* in time for an official book launch Oct. 14 at 4 p.m. at the Faculty Club.

"I'm satisfied," says Smith.

"The book does what it was supposed to do. The most detailed part deals with the development of academic programs and the campus between 1962 and 1968."

Smith admits he's omitted almost as much material as he's included.

"I'd like to write proper profiles about some of UVic's alumni and write more about the theatre department and the School of Music. I'm a sports fan and I'd love to write about the athletics program."

"But," he says leaving the door open to a companion volume for *Multitude of the Wise*, "that's another book."

Claire Heffernan, who is nearing completion of a display on the history of the Gordon Head Campus, was presented with a cheque for \$1,500 by University Librarian Marnie Swanson at a ceremony in Archives recently. The cheque was presented on behalf of President David Strong in appreciation of Heffernan's voluntary hours spent completing the special Archives display project. The portable exhibit of the history of the campus will be ready for public viewing later this month.

In Tribute to Karel Hartman

—The UVic Department of Chemistry

The Chemistry Department sadly announces the passing of Karel Hartman. He was born in 1931 and spent his early years in war-torn Europe, receiving much of his technical training while he worked in the chemical industry. His analytical experience was gained in his native Netherlands in the 1950s and early '60s, providing him with the ideal tools to assist Professor Lewis Clark in his research at UVic.

After arriving in Canada, Karel continued to study and was awarded his BSc from UVic in 1969. He became a laboratory instructor with the Chemistry Department and eventually became the laboratory supervisor, co-ordinating a team of eight permanent lab staff.

"The unit he built misses him dreadfully and yet functions without him," said David Berry, the department's acting lab supervisor. "That, surely, is the goal of a successful supervisor."

Karel was proud of his scholarly achievements. He co-authored 13 publications in his research field of ion-selective electrodes and in chemical education. He had close academic ties with the group of Professor W. Simon of E.T.H. in Zürich and spent several study leaves in Switzerland, where he met his wife Rita.

Karel will be remembered

by many on campus. He was responsible for constructing the illuminated periodic table and infrared displays featured prominently in the Elliott Building which are always popular with young visitors to the department. He used his dogged determination to pursue a point with administrators and to champion a fair deal on behalf of many teaching assistants. His photographic skills were sought by many a UVic chemist preparing slides for a lecture, and his students have lost an infinite resource on the quirks of our analytical instruments.

Outside of the University, Karel was active in his church, the Alpine Club of Canada, and as a visiting scientist in area schools. His love for the mountains is legendary, and he was a great source of information on hikes and climbs all over Western Canada. He was known to have climbed Mt. Arrowsmith twice in a day for the chance to cross-country ski down again. The motto outside his office door, "Time spent climbing mountains will not be deducted from your life," has a rather eerie ring to it now that he has gone at such an early age.

An undergraduate bursary and/or prize is to be established in Karel's name. Donations in memorium may be addressed to the University Development Office or to the Department of Chemistry.

Anthropologist to discuss the impact of global exchange on Latin American women artisans

Crafts in the Global Market will be discussed by anthropologist Dr. June Nash, the 13th speaker in the Women Scholars series, when she speaks at UVic on Oct. 21.

A distinguished professor of anthropology at the City University of New York, Nash has been a leader in the anthropological study of the impact of historical and contemporary changes on the lives of women in Latin America.

Her current research, which will be the focus of her talk at UVic, addresses the impact of global exchange on women

artisans and household production in the highlands of Chiapas, Mexico.

Nash has conducted extensive fieldwork among Mayan Indians in Guatemala and Mexico, with Aymar and Quechua tin miners in the Bolivian Andes, and with factory workers in Massachusetts.

In the early 1970s, Nash was at the forefront of anthropology in applying theories of development and underdevelopment to the study of women in Latin America. She has also encouraged and helped facilitate research by and publication of

the work of Latin American women scholars.

Among Nash's publications are *Sex and Class in Latin America* (with Helen Safa), *Women, Men and the International Division of Labor* (with M. Patricia Fernandez Kelly) and *Women and Change in Latin America* (with Safa). Most recently she has published articles on "Gender Issues in Latin American Labor," "Gender Studies in Latin America," and "Latin American Women in the World Capitalist System."

Transportation Task Force

Administration seeks campus feedback

The Transportation Task Force, commissioned by the University of Victoria seven months ago to examine the existing state of transportation to, from, and within the University campus and to recommend a future transportation policy, has published its report. Following are the report's executive summary and list of recommendations. Complete copies of the report may be viewed in the McPherson Library Reserve Reading Room.

Comments about the task force report and its recommendations are welcome. These may be submitted in writing to the office of the Vice-President, Finance and Operations, in Sedgewick A115.

REPORT OF THE UVIC TRANSPORTATION TASK FORCE

EXECUTIVE SUMMARY

The Task Force was established in February of 1993 as an ad hoc committee of the President reporting through the Vice President, Administration, with the task of examining UVic's existing transportation policies, their impact, the transportation plans of the municipalities, and of recommending a future transportation policy for the University. Membership of the Task Force included representatives of all segments of the University community, the North Henderson Residents' Association, the municipalities of Oak Bay and Saanich, the Victoria Region Transit Commission, BC Transit, and the public at large.

THE PRESENT TRANSPORTATION SYSTEM

The present transportation system has remained virtually unchanged since 1963, when UVic was relocated to its present campus. Despite Victoria's moderate climate and the University's proximity to many residential areas of the city, bicycle and pedestrian commuting has not been extensive. Today in favourable weather it can be expected to be only 15 per cent of campus traffic. Carpools account for very few visits to campus. Only two per cent of vehicles, or 300 cars, carry more than two people to the campus. Public Transit, despite active promotional efforts by BC Transit, has approximately 11 per cent (some 3,000 people each way) of the University traffic. This is about half the percentage figure of UBC, and substantially below Camosun College.

Three out of four arrivals to campus are by private automobile, with an average occupancy rate per vehicle of 1.25 persons.

To accommodate this, and as a result of municipal regulations that require the creation of new parking places as new buildings are erected, there has been steady construction of parking spaces over the years. These now cover almost 10 per cent of the campus.

The present system is in part the result of a policy of charging for parking on a cost recovery basis only. Over the past 30 years, only the cost of blacktopping and painting lines on the lot, and the cost of policing, have been used to calculate the parking permit fee. Parking has not been priced at levels which have taken into account willingness to pay, or the economic value of the land devoted to parking. In this sense UVic's parking system has provided a significant benefit to the automobile user. For the transportation system as a whole, this has resulted in greater reliance on the private automobile than would have been the case had parking fees taken other factors into account. This in turn has resulted in higher road and infrastructure costs to the municipalities of Saanich and Oak Bay, and to the University itself, than might otherwise have been the case.

In the view of the Task Force, there are a number of compelling reasons for changing this policy. First, continuing with the existing policy would be environmentally irresponsible. Driving automobiles to campus results in environmental impacts for which society as a whole must pay. Given its leadership role in our society, the University also should lead in promoting a more responsible and environmentally sensitive approach. Second, if expansion of the University and the present transportation policy continues, the open and natural character of the campus, now one of its most attractive features, will be impaired. Third, as the University continues to expand, the present policy will require further substantial expenditures to upgrade the road system on campus and the road systems which lead to the University.

The Task Force has concluded that UVic should adopt a

transportation policy which would actively encourage the use of public transit, carpools, bicycles, and commuting to campus on foot. It believes that this can be accomplished gradually and smoothly over the next three years by a series of measures in a number of different areas. Specifically, the Task Force recommends a system of bus pass subsidies for faculty, students and staff to promote public transit use, improved cycling access to campus and greater cycling facilities on campus, a free parking pass inside the Ring Road for automobiles and vans registered as car pool vehicles, and, finally, some minor and inexpensive campus improvements for the benefit of pedestrians.

The Task Force believes that the transportation goal of the University over the next three years should be to double the number of those who use these alternative ways of commuting to campus. It believes this goal can be achieved through incentives, without any appreciable coercive measures. Choice for those who wish to drive to UVic and park on campus would be preserved. Choice and flexibility for others who do not wish to commute in that way would be enhanced.

THE TRANSIT SUBSIDY PROPOSAL

The primary feature of the Task Force's proposed policy is raising the numbers of students, faculty and staff using public transit over the next three years from the present 11 per cent to 22 per cent. The Task Force believes that student use of public transit is price sensitive, while faculty and staff look more to frequency of service and convenience. Frequency of service and convenience, however, follow increased bus use. From the policy point of view the two user groups are thus complementary—as more students use the bus because of lower cost of bus passes, service will improve and more faculty and staff will join them. The key is reducing the cost of the bus pass. Further, as this University traffic increases, the public transit system for those who live

between the University and the downtown core will improve to the same degree. It should thus receive greater utilization, reducing road and parking congestion elsewhere in the region.

BC Transit bus pass prices for adults are \$45 per month. For full time students, there is a Victoria Region Transportation Commission subsidy of \$8, which lowers the price to \$37 for UVic students. To reduce the student bus pass cost a further \$8, to \$29 would require a total subsidy of \$148,000. The Task Force recommends that this bus pass price be established, and the subsidy amount raised by a parking levy on students parking permits. For faculty and staff, the subsidy figures per individual bus pass are somewhat higher, as there is no \$8 subsidy from the Victoria Region Transportation Commission. To provide the same \$29 bus pass price for faculty and staff as for students, which the Task Force recommends, the amount needed to be raised from those who purchase underground, general and general reserve parking would be \$76,800.

CYCLISTS

Improving cycling access and safety is the second major recommendation of the Task Force. The report contains a large number of specific recommendations in this regard, both for the long term and for immediate implementation.

First, both in importance and in terms of when it should be implemented, is an educational campaign for both cyclists and motorists. Such courses are readily available, and have been shown to be effective. Second are improvements to the Ring Road, access roads, and campus paths.

Third are improvements to showering, lockers, and bicycle parking facilities. Among the long term recommendations is the creation of cycling commuting committee, surveys of cyclists, and traffic studies of problem intersections.

The proposed cycling measures are not expensive. Many of them will also benefit pedestrians. The Task Force believes that a fund should be established to permit the proposed cycling committee to initiate action on its own, and to encourage other bodies to contribute to improvements through cost sharing. The Task Force believes that the fund should receive approximately \$135,000 annually, of which \$95,000 should be raised through a surcharge on student parking fees, and \$40,000 from a surcharge on the parking fees of

faculty and staff.

CARPOOLS

In addition to doubling the numbers carried on the bus, the Task Force believes that carpools, whose role in the present transportation system is insignificant, can become a useful commuting method. At present only 300 cars, or two per cent of those who come to campus, come in cars carrying more than two people. Were carpool vehicles to be given free parking, and were carpool parking located in the most convenient locations, namely in lots inside the Ring Road or under the University Centre, the Task Force is confident that the present contribution of carpools would slowly increase. At least in the first year of the three year program, the cost of these incentives should be borne by the administration. In year two or year three, it might be factored into the parking fee.

PEDESTRIANS

The proposed new transportation policy has a number of aspects which will encourage walking to the University. Increasing UVic's parking fees will cause some people who live close to the campus to leave their cars at home. Improvements to the campus to assist bicycles, such as the creation or widening of paths, will make walking to UVic more attractive. Improved locker and showering facilities will help the pedestrian. While the Task Force expects the number of pedestrians to increase, it is not able to provide any estimate as to how much of an increase is likely to take place. The cost of these improvements is minor, and might come out of the cyclists commuting fund.

PARKING

The measures outlined above are expected to double the numbers who come to the campus by alternative means. Thus they are expected, in absolute terms over the next three years, to reduce the demand for parking that UVic has experienced in recent years. This has two aspects; on the one hand parking, and driving to campus, becomes more convenient for the person who is willing to pay the extra parking fee and continues to drive, while on the other, the parking places will become less heavily utilized, at least until an increase in the university population results in last year's vehicle numbers being reached once more.

The Task force is concerned about the impact of the municipi-

releases report

pal regulations that require the establishment of new parking spaces when a new building is put up. Given the proposed new transportation policy at UVic, such construction is counterproductive, and not in the interests of the municipalities or the University. The Task Force recommends that the UVic administration take this matter up with the municipalities, and request a waiver of these requirements until need for more parking places is proven.

PARKING FEE PRICING

In the calculations above, the level of bus pass subsidy has been discussed in terms of the individual purchaser of a bus pass, and in terms of the totals required to obtain those pass prices. The paragraphs below outline how these total subsidies will affect the price of parking permits.

Allowing for a reduction in parking permit purchases to account for the expected increase in alternative commuting, the \$148,000 transit subsidy, and the \$90,000 bicycle subsidy results in an increase to each annual student parking permit of \$51.

For faculty and staff (general parking, general reserve and underground) the amount required per annual pass would be \$60. Student parking thus would rise to approximately \$105.50 a year, general parking passes to approximately \$133, general reserve parking would be at approximately \$187, and underground parking at approximately \$350.

The Task Force has compared these prices with other Canadian universities, particularly UBC, Simon Fraser, and Queens, and finds UVic parking is still substantially lower than the amounts charged at other institutions. Even with the transfer of the student \$51 per parking pass or the faculty and staff \$60 per parking pass to those who use alternative transportation, the automobile driver at UVic is still getting a parking bargain. The Task Force proposals modify and reduce, but do not eliminate, the existing cheap parking policy.

The Task Force wishes to note in particular that the system it has proposed involves transfers between individuals within each campus group. For example, for each student who pays an extra \$51 a year on parking, there is another student who benefits, and his or her benefits are equal to the \$51 paid by the student who buys a parking permit. Within any group on campus, whether faculty, staff or students, the benefits received and the extra

payment made are essentially the same. As a group, none would be advantaged or disadvantaged over the situation of last year.

IMPLEMENTATION

The Task Force strongly recommends that a decision be made on its proposals soon, and if they are accepted, that they be put in place in September of 1993. In its opinion, there is adequate time to implement the policy before the commencement of the academic term.

It notes that if the subsidy for bus passes that it has proposed is not in place, the price of a bus pass will rise \$5 a month over the 1992-93 price. Given student price sensitivity to public transit, it is particularly concerned that this increase will have the opposite result to what the Task Force believes should occur. The use of public transit next year may well decrease, and automobile use increase. If it proves not possible to have a parking surcharge in place this year, the Task Force recommends that the administration provide the subsidy out of other revenues. The 1993-94 cost might be made up in the future.

With respect to the proposed UVic Cycling Commuters Committee, the Task Force notes the momentum that has been developed over the summer months by its own Bicycle Users Committee. It does not want that positive work to be wasted.

CONCLUSION

The Task Force believes that the commencement of UVic's fourth decade on the Gordon Head campus is an appropriate time to change its transportation policy to one which provides greater choice and flexibility to the university community. The significance of the measures it has proposed lies not only in their impact over the next three years, but in the change of direction that they signal for the decades ahead.

The Task Force has stressed choice and flexibility, and has not proposed coercive measures or deliberate inconvenience. Further, it notes that implementation of its proposals does not involve increased university expenditures, or involve financial loss or disadvantage to any particular group on campus. The package of recommendations it has developed is modest and achievable. It believes that they will be acceptable to the University community.

PRINCIPLE RECOMMENDATIONS OF THE TRANSPORTATION TASK FORCE

1. That UVic establish a goal of doubling the commuting share of cycling, walking, public transit and carpools over the next three years.
2. That UVic establish a goal of reducing automobile commuting to campus to below 50 per cent of total visits.
3. That the annual parking fees for student parking include an additional charge of \$51, to be used to subsidize the UVic bus pass for students, and to pay for campus bicycle improvements.
4. That the annual parking fees for faculty and staff include an additional charge of \$60, to be used to subsidize the UVic bus pass for faculty and staff, and to pay for campus bicycle improvements.
5. That a UVic bus pass at \$29 per month be available to faculty, students and staff during the 1993-94 academic year, and that this price be a ceiling price for the subsequent two years.
6. That the price of the bus pass and the sensitivity of bus pass demand to price be evaluated annually, with a view to reducing the price of the bus pass to \$25 when conditions warrant.
7. That UVic seek a minimum three year exemption from municipal regulations that require the construction of more parking facilities when new buildings are erected on campus, and that in future new parking facilities be constructed on campus only in cases of proven demand.
8. That a survey of campus bicycle users, and a campus bicycle traffic survey, be undertaken in the fall of 1993.
9. That a university committee be established to encourage bicycle commuting.
10. That UVic provide introductory courses on safe cycling.
11. That UVic issue safe cycling information to both cyclists and motorists at the beginning of the academic year.
12. That the speed limit on the Ring Road be reduced to 40 km/hr.
13. That the 40 km/hr speed limit be enforced, particularly at the beginning of each term.
14. That vegetation near exits and entrances of the Ring Road be pruned back, and crosswalks repainted where worn.
15. That the number of access points to the Ring Road from parking lots be reduced.
16. That on four lane access roads which do not have bicycle lanes, the curb lane be wider than the centre line lane.
17. That a special bicycle lane be established on Henderson Road between Cedar Hill Cross Road and the Ring Road.
18. That the number of lockers on campus be increased, and that there be a reservation system for lockers, with priority for cyclists and pedestrians.
19. That there be a covered parking facility for bicycles near the McKinnon Building.
20. That part of the underground automobile parking area of the University Centre be converted to a parking, locker, and showering facility for cyclists.
21. That carpool vehicles receive free parking in lots within the Ring Road, and that these benefits be advertised.
22. That narrow pedestrian paths on campus be widened to reduce cyclist/pedestrian conflict.
23. That the number of parking meters in lots within the Ring Road be doubled.
24. That parking on the north side of Cedar Hill Cross Road be prohibited during the morning and afternoon rush hour period, and that it be restricted to two hours during the remainder of the day.

Transportation Task Force members

David Anderson, Chair
 Carrie Bronson, Graduate Students Society, UVic
 Murray Coell, Mayor of Saanich and member, CRD Transportation Committee
 Ron Drolet, B.C. Transit

United Way profile

Colin Jones

BY PATTY PITTS
When Dr. Colin Jones (Economics) accompanied a colleague, the late Dr. Roy Watson, to a conference in 1980 he had no idea it would lead to a 13-year commitment to the Capital Mental Health Association.

"Roy persuaded me to join," says Jones, who now sits on the association's Board. "He was a founding member of the CMHA. It seemed like a good idea because the organization needed the help. Mental health had a much lower profile in those days, and it didn't attract volunteers as easily as other health-related organizations."

The Capital Mental Health Association, just one of 38 agencies supported through the

through Laurel Enterprises; Community Ex, assisting young adults in handling the skills of day-to-day living, and an adult day care service for those with Alzheimer's disease.

The latter would not be possible, says Jones, without the association's annual funding through the United Way.

"That program requires a high staff/client ratio," he explains. "The United Way funding enables us to hire the required staff. The funding also pays for the hot breakfast program we run at Laurel House for people with a chronic mental illness."

Jones has been a member of the University's faculty for 30 years. He arrived here from Queen's when economics and political science was a joint department with a total of four faculty members. He's one of many faculty, staff, and students who volunteer their services each year with a United Way agency. *The Ring* will profile a different volunteer in each issue during the United Way Campaign on campus.

United Way, provides programs for citizens of all ages suffering from a wide variety of mental disorders.

"Not so long ago mental illness was hidden by most families. The people were shut away. Now attitudes are swinging the other way, and mental patients are being released into communities," says Jones. "That only works if you have programs in place to support these people. If you don't, the situation could be worse than before."

Patients need referrals from their physicians to participate in the association's programs. These include Laurel House, a drop-in centre for people preparing for vocational training

The Campaign kick-off breakfast will be held at 7:30 a.m. Oct. 5 at the Faculty Club. Guest speaker will be Alison Anderson, the Family Enhancement Program Co-ordinator for the Island Deaf and Hard of Hearing Centre, a United Way agency. All those who support the Campaign on campus are eligible to win weekly draw prizes. Grand prizes of a luxurious stay at Dunsmuir Lodge or at a Mount Washington ski condominium will be awarded when the Campaign wraps up in early December.

What's Blooming at UVic?

Horse chestnuts

The perennial collection in the University of Victoria Finnerty Gardens continues to bloom under seasonal sunny conditions. Included in the recent blooming are the Purple Meadow Rue, Purple Cone Flower, Lobelia 'Blue Magic,' tall

purple Verbena and the red, pink, and purple broccoli-like flowers of the Sedums.

Several varieties of Heather, Hydrangea, Potentilla, and Fuchsia continue to bloom in shades of white, yellow, red, and blue.

The berries of many plants are quite colourful now, particularly the showy pink fruit of the European Spindle Tree, which splits to show bright orange seeds. The three different species of Mountain Ash are laden with pink, yellow, and white berries.

The perennial *Arum italicum*, a lily-like plant, has long spikes filled with dense clusters of bright orange-red seeds. Also with bright red seed pods hanging like Christmas ornaments is the *Magnolia sieboldii*.

The fall *Cyclamen* are now in bloom with pink flowers that resemble shooting stars.

= RINGERS =

Elinor Rhynas, who has served in the Division of Continuing Studies as Senior Program Co-ordinator of the English Language Centre for the past seven years, has been appointed Program Director, ESL Professional Development and Project Management.

Cecilia Mavrow, full-time lecturer in the Department of English, is running in the Victoria riding as the federal National Party candidate in the Oct. 25 election. Mavrow, a popular lecturer on campus for the past six years, will run against NDP MP John Brewin, Liberal candidate David Anderson, Progressive Conservative candidate Faith Collins, and Reform Party candidate Patrick Hunt.

Crime prevention bulletin

Campus crimes reported for August 1993

Type of crime	Number of reports
Break, enter & theft	1
Theft of UVic property	4
Theft of private property	6
Theft from auto	2
Theft of bicycle	1
Theft of bicycle parts	3
Theft of backpack	1
Theft of wallet or purse	10
Vandalism of private property	1
Vandalism of UVic property	4

The Campus Safe Walk Program provided 14 escorted trips in August 1993.

LETTERS

United Way message from David Strong

Dear Colleagues:

You may have been one of the University of Victoria faculty and staff who gave to the United Way last year. If so, you have the satisfaction of knowing that you made a real difference in someone's life. To those of you who did not contribute last year, I am asking you to consider giving a part of your charitable donation this year to the United Way.

Last year 16 percent of our faculty and staff gave to the United Way. These 428 people generously donated \$63,088 toward the overall Greater Victoria campaign total of \$3,759,268. The target this year for UVic is a modest \$70,000. Every dollar we contribute remains in our community. One in three Victorians receives services from United Way agencies.

Did you know....

- \$5.00 a week for a year buys a talking book machine for a visually impaired person.
\$260/year payroll deduction
- \$2.50 a week for a year pays the fees for one child for summer day camp
\$130/year payroll deduction

We are fortunate to have received widespread public and university support for our own UVic Challenge Campaign, even during this time of economic restraint. I ask you to join me in returning that support to the community by donating to this year's United Way campaign.

Sincerely

David F. Strong
President and Vice-Chancellor

Traffic & Security speaks out on parking rates—and other matters

Editor,

This is our response to Reg Mitchell's letter printed September 17, 1993:

Reg Mitchell! Shame! Shame! Shame on you! You are a scientist, not a pseudo-journalist! As a scientist you always check your facts before coming to a conclusion.

Therefore, we must correct you on the following:

- Don Marykuca did not close the Ring road. He only passed the message on to the University community so that people like you wouldn't be frustrated.
- Outlandish parking rates? A reality check reveals that the University of Victoria is virtually the cheapest place to park in Canada. Try Camosun.
- Complaining about having to lock your vehicle? According to the Motor Vehicle Act, a vehicle is to be locked at all times when the owner/driver is not in attendance.
- Additional pouches are \$1.50, not \$5. We certainly hope that you have not had the misfortune to purchase a "black market" pouch!
- Really, Reg! Expecting your spouse to transfer your permit to whichever car you're using? You're a big boy now: accept the responsibility for yourself!

And finally, when you call our office to complain, would you please identify yourself upfront?

Thanks,

The staff from Traffic & Security,
Bill Johnston
Jean Jonasson
Gwen Spearman
Paul Totzke

Tickets available for 90/30 dance

Grab your hair spray and knot that skinny tie. Get ready to rock to the tunes of 1963 at the Classic Rock 'n Roll Revival Dance featuring Doc and the Doo-Wops on Oct. 16 at 9 p.m. in the Cadboro Commons Building. This fun-filled event to mark UVic's 90/30 Anniversary year will feature door prizes and special prizes for those who can complete the dance's nostalgia quiz.

The drinks at the no-host bar will reflect 1993 prices but the Coke, hot dogs and pizza will all be 25 cents each (just like in 1963)! Tickets are \$10 each and are available at Student and Ancillary Services, Athletics and Recreational Services, Campus Planning, Housing and Conference Services and Human Resources.

Chippy incidents lead to complaints

A few heated exchanges between joggers and walkers recently have given a new meaning to the concept of "chip trails."

"Our office has received a few complaints about some joggers on the chip trails being verbally abusive to other users," says Ken Marrison, Assistant Manager of Traffic and Security. "We'd like to remind everyone that the trails were put there for the use and enjoyment of joggers and walkers."

Marrison adds that the only restriction on the use of chip trails is that bicycles are not allowed, except by Traffic and Security patrol officers. People walking their dogs on the chip trails must keep them on a leash.

Marrison asks for consideration and courtesy by all users of the chip trails.

Petition to outlaw handguns supports Concordia campaign

UVic President Dr. David Strong has directed that copies of a petition to outlaw handguns in Canada be made available for circulation on campus.

The national petition campaign is centered at the Concordia University Rector's office and is aimed at presenting the petition to the new government after the federal election. More than 150,000 Canadians had signed the petition as of the end of August.

The petition is worded as follows: "The undersigned call on the Parliament of Canada to enact immediately laws prohibiting anyone in Canadian territory from having in their possession any handgun, with the exception of members of the Canadian Armed Forces and Law Enforcement Officers for the purpose of their duties."

Copies of the petition are available by calling Public Relations at local 7636.

Law demystified by minority rights activist

Dr. Glenda Simms, President of the Canadian Advisory Council on the Status of Women and a long-standing activist for minority rights, will speak on "Demystifying the Law: A Time for Soul Searching," at 12:30 p.m. Oct. 14 in Begbie 159. The lecture is free and open to the public as part of the Faculty of Law's ongoing Social Justice Series.

Simms worked as a teacher in her native Jamaica before coming to Canada in 1966 to teach among the Métis and Cree peoples. Her commitment to Aboriginal issues continued through her career as a faculty member teaching native education at the University of Lethbridge, the head of the Native Education Department at the Saskatchewan Indian Federated College, and the supervisor of Intercultural Education and Race and Ethnic Relations for the Regina Public School Board.

Simms is currently on leave from the Faculty of Education at Nipissing University College in North Bay, Ontario. Her work on behalf of Aboriginal rights, women's rights, and the rights of racial minorities has won her numerous awards including the InterAmicus Human Rights Award from McGill University in 1992. She was a founding member of the National Organization of Immigrant and Visible Minority Women of Canada, served as President of the Congress of Black Women of Canada, and was a member of the Canadian non-governmental delegation to Forum '85 in Nairobi, Kenya, marking the end of the United Nations Decade for Women. Simms is currently working on a book examining racism and sexism in Canadian society.

GAZETTE

The Board of Governors reports the following proceedings from the regular meeting of the Board of Governors held on September 27, 1993, effective as shown.

NEW APPOINTMENTS - FACULTY

Connie M. Gaglio, B.A. (SUNY - Brockport), appointed Visiting Lecturer, School of Business, effective July 1, 1993 to June 30, 1994.

S. Joan Wharf Higgins, B.A. (U. of Victoria), M.A. (U. of Victoria) appointed Assistant Professor, Department of Physical Education, effective July 1, 1993 to June 30, 1996.

Catherine A. Gaul, B.Ed. (U. of New Brunswick), M.Sc. (Simon Fraser), Ph.D. (U. of Victoria), appointed Assistant Professor, Department of Physical Education, effective July 1, 1993 to June 30, 1996.

Sandra Meigs, B.F.A. (N.S. College of Art & Design), M.A. Philosophy (Dalhousie), appointed Assistant Professor, Department of Visual Arts, effective July 1, 1993 to June 30, 1996.

Donovan W.M. Waters, Q.C., B.A., B.C.L., M.A. (Oxon), Ph.D. (London), D.C.L. (Oxon), Professor, appointed to the Donovan Waters Scholars Chair, Faculty of Law, effective July 1, 1993 to June 30, 1996.

SPECIAL APPOINTMENTS

Michael E. Corcoran, appointed Associate Dean, Research, effective July 1, 1993 to June 30, 1998.

Mary Anne Waldron, appointed Acting Dean, Faculty of Law, effective July 16, 1993.

Patrick T. Gregory, appointed Chair, Department of Biology, effective July 1, 1993 to June 30, 1994.

Barrington F. Beardsmore, appointed Chair, Department of French Language and Literature, effective July 1, 1993 to June 30, 1996.

John Anderson, appointed Chair, Department of Psychological Foundations, effective July 1, 1993 to June 30, 1996.

Nicholas V. Galichenko, appointed Chair, Department of Slavonic Studies, effective July 1, 1993 to June 30, 1995.

John C.E. Greene, appointed Director, Teaching and Learning Centre, effective July 1, 1993 to June 30, 1994.

John L. Osborne, appointed Director, Department of Medieval Studies, effective July 1, 1993 to June 30, 1996.

Robert D. Bell, appointed Director, Department of Education Extension, effective July 1, 1993 to June 30, 1996.

Arnold Keller, appointed Director, Writing Program, Department of English, effective July 1, 1993 to June 30, 1996.

Life in laboratory is Nobel Prize winner's topic

Canadian-born Dr. Sidney Altman, who won the Nobel Prize for chemistry in 1989, will speak about "Understanding Life in the Laboratory," on Oct. 13 at 8 p.m. in the David Lam Auditorium. This President's Distinguished Lecture is free and open to the public.

Altman's research involving nucleic acid biochemistry and genetics has earned him wide acclaim. He was named a Fellow of the American Association for the Advancement of Science in 1987, a member of the American Academy of Arts and Sciences in 1988 and a member of the National Academy of Sciences, USA, in 1990. He was awarded the Distinguished Service Medal

Richard Williams, appointed Director, Professional Studies, effective July 1, 1993 to June 30, 1994.

G. Kim Blank, appointed Faculty coordinator, Humanities Diploma Program, effective July 1, 1993 to June 30, 1994.

Thomas Alan Hughes, appointed Acting Associate Dean, Faculty of Fine Arts, effective January 1, 1994 to June 30, 1994.

Margaret Cheryl Crane, appointed Acting Associate Dean, Faculty of Law, effective July 12, 1993 to June 30, 1995.

Evelyn Cobley, appointed Director, Literature Program, Department of English, effective July 1, 1993 to June 30, 1995.

James McRae, appointed Director, Distance Education Program, School of Public Administration, effective July 1, 1993 to June 30, 1994.

Andrew Armitage, appointed Faculty Coordinator, Distance Education, School of Social Work, effective July 1, 1993 to June 30, 1994.

Betty A. Hanley appointed Chair, Arts in Education Department, effective September 1, 1993 to June 30, 1996.

Beverly Timmons appointed Acting Dean, Faculty of Education, effective September 1, 1993 to June 30, 1994.

Frederick I. Bell appointed Acting Associate Dean, Faculty of Education, effective September 1, 1993 to June 30, 1994.

REAPPOINTMENTS

Claude L. Normand, School of Child and Youth Care, reappointed Visiting Lecturer, effective July 1, 1993 to June 30, 1994.

William McNally, School of Business, extended as Visiting Lecturer, effective July 1, 1993 to June 30, 1994.

Thomas Lawrence, School of Business, extended as Visiting Lecturer, effective July 1, 1993 to June 30, 1994.

Steven Tax, School of Business, extended as Visiting Lecturer, effective July 1, 1993 to June 30, 1994.

Angela Tripoli, School of Business, extended as Visiting Lecturer, effective July 1, 1993 to June 30, 1994.

Lianne M. McLarty, Department of History in Art, reappointed Visiting Lecturer, effective July 1, 1993 to June 30, 1994.

George D. Spence, Department of Earth and Ocean Sciences, granted extension of URF position, effective July 1, 1993 to June 30, 1994.

RESIGNATIONS

Eugene W. Romaniuk, Professor, De-

partment of Psychological Foundations, Faculty of Education, effective August 31, 1993; also Dr. Romaniuk's resignation as Dean of Faculty of Education, effective July 31, 1993 (resignation).

Michael Murphy, Assistant Professor, School of Business, effective June 30, 1993 (resignation).

ADMINISTRATIVE AND ACADEMIC PROFESSIONAL

NEW APPOINTMENTS

Gina Martone, B.A. (U. of Western Ontario), M.A. (U. of Manitoba) appointed Research Coordinator, Centre on Aging, effective August 13, 1993.

Lucille Marie McKay, E.C.E. (U.B.C.), appointed Manager, Child Care Services, effective September 1, 1993.

Patricia Marie Schmidt, B.Sc. (U. of Victoria) appointed Co-ordinator, Athletics, Department of Athletics and Recreation Services, effective September 27, 1993.

Ann Nightingale, B.Sc., M.P.A. (U. of Victoria) appointed Acting Director, Graduate Admissions and Records, effective July 1, 1993 to December 31, 1993.

SPECIAL APPOINTMENT

Laurence Devlin, appointed Director of Research and Development, Division of Continuing Studies, effective July 1, 1993.

EXTENSION OF APPOINTMENTS

Wes Koczka, Division of Continuing Studies, granted an extension of term position as Program Co-ordinator, Education Extension, effective July 1, 1993 to August 31, 1993.

Wes Koczka, Director of Program Development, Division of Continuing Studies, extended to September 30, 1993.

Brishkai Lund, Division of Continuing Studies, granted an extension of term position as Program Co-ordinator, Arts and Science, Women's and Seniors' Programs, effective July 1, 1993 to August 31, 1993.

Brishkai Lund, Director of Program Development, Division of Continuing Studies, extended to September 30, 1993.

Peggy Faulds, Division of Continuing Studies, granted an extension of term position as Program Co-ordinator, Arts and Science, Women's and Seniors' Programs, effective July 1, 1993 to August 31, 1993.

Peggy Faulds, Program Coordinator, Arts and Science Women's and Seniors' Programs, Division of Continuing Studies, extended to September 30, 1993.

RESIGNATIONS

Gus Agostinis, Program Assistant, Division of Continuing Studies, Education Extension, effective July 30, 1993 (resignation).

Douglas W. Hull, Projects Officer, Maintenance, effective July 13, 1993 (resignation).

Harry J. Zarins, Coordinator of Athletics, effective June 30, 1993 (resignation).

Evelyn Samuel, Director of Public Relations and Information Services, effective September 30, 1993 (resignation).

Richard Chadwick, Programmer Analyst, Computing User Services, effective August 27, 1993 (resignation).

Rudy Zittlau, Senior Systems Programmer, Computing and Systems Services, effective August 31, 1993 (resignation).

Richard Chadwick, Programmer Analyst, Computing User Services, effective August 27, 1993 (resignation).

The Mail Order Bride to be staged at Phoenix

A quaint, bittersweet depiction of early 20th century life on the Canadian prairies will open Oct. 14 at the Phoenix Theatre. Dinner theatre dates are Oct. 19 and Oct. 26.

The Mail Order Bride by Robert Clinton, winner of the 1988 Alberta playwrighting competition, takes us back through the life of Harold English to his first encounter with Charlotte Emery, the mail order bride, in 1908.

Guest director for this

- F** 2:30 & 6:30 & 9:20 p.m. *The Firm* (USA, 1993) Sydney Pollack. \$4-\$6. SUB Theatre. Info 721-8365.

A preview lecture by Kim McCaw and Robert Clinton, free and open to the public, will be at 12:30 p.m. on Oct. 14 at the Phoenix.

The Phoenix box office, at telephone 721-8000, opens Oct. 7. Box office hours are 12 noon to 3 p.m. and 6 p.m. to 8 p.m.

Law students shine in Shinerama

The Cystic Fibrosis Foundation is \$5,245.76 richer thanks to the efforts of UVic's law students during Shinerama, a day-long fundraising event held in Greater Victoria Sept. 18. About 70 students, organized by Students of Law Involved in the Community (SLIC), took their shoe shine boxes to the area's malls to buff wingtips in exchange for donations to CF research.

"There were some students out on the streets downtown,"

said second-year law student Richard Gelder, "but we got our best results in the malls."

Law students solicited donations in the Eaton Centre, Hillside Mall, Tillicum Mall, Mayfair, Shelbourne Plaza, University Heights and Canwest Mall. This is the first time the law students have been involved in Shinerama. They were the only students in Victoria to participate in the nation-wide event.
